numbering solutions

number management system

Number administration is a highly complex process. Regulators today contend with scarce number resources, sometimes up to 20 different resource types, and the commitment to service providers that number assignments will be timely, equitable, and impartial.

Number administration, like all complex telecom processes, demands a user-friendly, automated, and centralized solution.

The iconectiv Number Management System supports your country's entire national numbering plan. It simplifies number resource assignment processes and minimizes the potential for errors, saving time and money along the way.

Our solution is used by national regulators all around the world who turn to iconectiv for unrivaled experience and superior numbering solutions.

Our Number Management System can help you:

- Record, track and efficiently manage online applications for number resources
- Monitor and assign number blocks using a centralized database to save time and minimize potential for human errors
- Generate and access detailed usage metrics, application fees and annual charges

number portability gateway

The iconectiv Number Portability Gateway is specifically designed to help service providers simplify and automate management of all number porting related processes.

Our scalable, off-the-shelf system serves as an external bridge between the national clearinghouse and a service provider's environment. It coordinates across back-office systems to process porting transactions, and informs network elements of updated changes to maximize call completion rates.

Our Number Portability Gateway can help you:

- Confidently meet your number portability requirements
- Automate number portability transactions to reduce costs, time and errors
- Deliver fast and accurate responses to subscriber porting requests
- Maximize customer satisfaction
- Keep network elements automatically updated on successful number porting changes
