keeping the world connected

Communication is our lifeblood. It's what makes the world run and gives our lives meaning. Though technology evolves, the desire to seamlessly and securely access and exchange information anywhere, anytime never changes. While technological advances make communications simpler and more ubiquitous, efficiently interconnecting disparate applications, networks and devices and delivering it to the right person, at the right time in the right way is enormously complex.

Creating a globally connected world is what iconectiv does better than anyone. Our cloud-based Software as a Service (SaaS) and information as a service solutions span network and operations management, numbering, trusted business-to-consumer (B2C) messaging communications and fraud prevention.

At iconectiv, **our vision** is a world without boundaries, where the ability to access and exchange information is simple, seamless and secure.

And **our mission** is enabling the world of tomorrow through the simple, seamless and secure interconnection of networks, devices and applications.
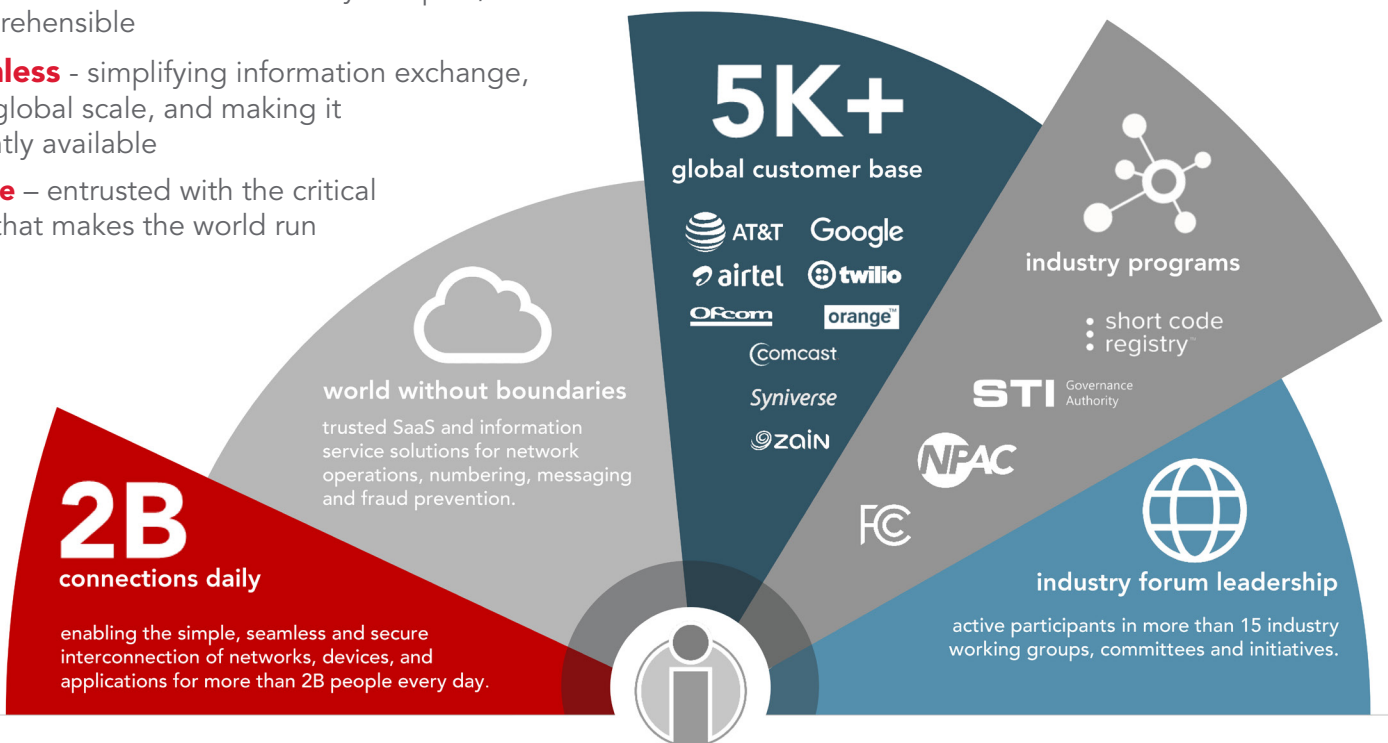

business principles

With unparalleled leadership and legacy in global communications, iconectiv strives to make connectivity:

simple – making the systems and processes that are extraordinarily complex, comprehensible

seamless - simplifying information exchange, on a global scale, and making it instantly available

secure – entrusted with the critical data that makes the world run

solutions

TruNumber: confidence in communication

Between maximizing efficiencies, decreasing operational costs and safeguarding customer data, businesses have more items to consider with phone numbers. By leveraging accurate, precise data, iconectiv TruNumber, our comprehensive suite of SaaS and information services, can help you address these issues head-on.

TruNumber Finder
Simplify number management and expedite call-completion and number porting issues with this information service.

TruNumber Gateway
Seamlessly manage phone number changes and maximize call completion rates.

TruNumber Intel
Speed delivery, maximize resources and streamline B2C voice, text and messaging engagement.

TruNumber Portability Clearinghouse
Drive choice, convenience and innovation with the world leading number portability and port processing solution for regulators and service providers.

TruNumber Protect
Proactively identify and block communications fraud and suspicious activity with this information service.

TruNumber Resolver
Eliminate number portability routing challenges and simplify numbering plan changes with this information service.

TruNumber Routing
Prevent revenue leakage with this industry-leading information service.

engage with success

How do you stay engaged with clients in today's always-moving economy? Through personalized messages, comprehensive campaign management and a secure messaging network. The iconectiv solution lets you strengthen relationships and drive revenue with targeted, timely consumer engagements.

Aerialink
Connect employees, partners, customers and devices across your organization with this SaaS cloud-based text enablement platform for B2C engagement.

TruOps: operate with efficiency

Service providers are expected to route, rate and bill for billions of calls and messages accurately. At the same time, you are under constant pressure to maximize efficiencies and improve network planning, with less time and resources. In order to achieve these objectives, you need efficient access to reliable, scalable and proven systems and processes. That's where iconectiv TruOps comes in.

TruOps Common Language
Simplify data information maintenance and streamline capacity management with this centralized SaaS data management and information service.

TruOps Telecom Routing Administration
Improve network planning, decrease operational costs and prevent revenue loss with this SaaS for call routing, rating, billing and network maintenance.

TruOps Virtual
Speak the same language with multiple vendors, save costs and accelerate revenue generation with this information service that streamlines and accelerates VNF onboarding.

TruOps 8MS
Efficiently manage toll-free numbers, save money and re-route calls quickly with this SaaS platform.

Industry Programs

With an unparalleled depth of experience, iconectiv has the unique ability to manage and run programs on behalf of partners. iconectiv currently serves as the:

Local Number Portability Administrator
The nation's Number Portability Administration Center (NPAC), which facilitates number porting in the United States.

Short Code Registry Administrator
Offer businesses unequalled opportunities to engage audiences through branded text messaging.

Secure Telephone Identity Policy Administrator (STI-PA)
As the policy administrator, iconectiv will apply and enforce the rules to mitigate illegal robocalls and help consumers, once again, trust the calling number displayed on their caller ID.
