TruReach Toll-Free 8MS Overview

TruReach Toll-Free 8MS simplifies and automates toll-free number (TFN) provisioning and complex routing. Our value-added SaaS platform integrates with the national toll-free number registry, to enable toll-free number reservations and updates in bulk,and helps our customers perform other administrative tasks necessary for managing their toll-free numbers.

With Toll-Free 8MS, users gain valuable insights into their toll-free number records, including routing and historical information, so they can more effectively manage their TFNs, implement complex routing and least-cost routing (LCR) to save money and reroute quickly and efficiently during an emergency.
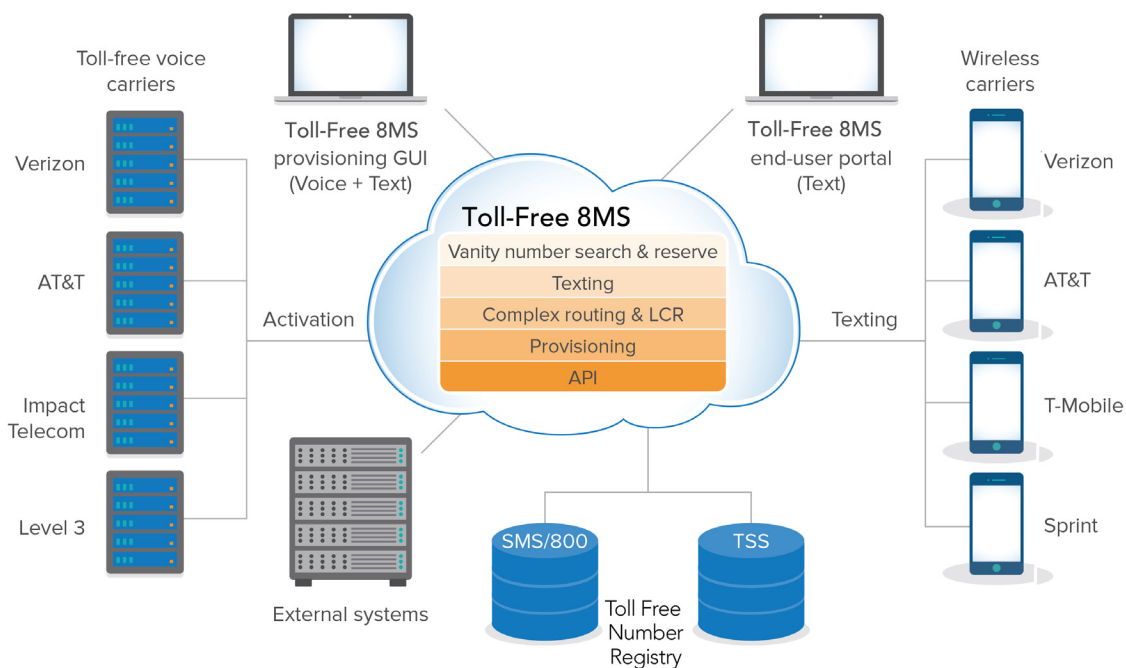

Toll-Free 8MS provides add-on services for automating the creation of complex and least-cost routings across major carrier networks and allows users to activate them directly to their networks. Additionally, Toll-Free 8MS offers a complete turnkey solution for adding text messaging to toll-free numbers.

All Toll-Free 8MS service functions are available through the 8MS Web-based graphical user interface (GUI). Alternatively, toll-free carrier and RespOrg customers have the option of integrating their commercial websites and in-house API.

"

TruReach Toll-Free 8MS allows us to provision faster and with confidence. Before using it, we had to dedicate additional team members to toll-free provisioning."

Mandy Cerise-Richards
Manager – Toll Free Provisioning, Onvoy

- Complete mass changes and updates quickly in a single action
- Provide easier and safer methods of optimizing TFNs and making routing changes
- Provide emergency rerouting of toll-free numbers in case of an outage
- Graphically manage, validate, and fix toll-free number routing
- Mine the Toll-Free Number Registry database and the Toll-Free 8MS historical TFN archive for better business intelligence
- Easily create complex routing (routing sets and templates) and LCR
- Activate toll-free numbers in Toll-Free Number Registry and your carrier networks directly in one step
- Use custom screens and access permissions for different workgroups
- Track and log all activities using secure password access and unique logins
- Access a turnkey solution for text-enablement and delivery of texting on toll-free numbers

platform services

Toll-Free 8MS Core
The main application service of the platform that simplifies and automates the provisioning of toll-free numbers.

Toll-Free 8MS Carrier Express
A standalone or add-on service of the platform that automates the carrier-side provisioning and activation process.

Toll-Free 8MS API
An add-on service that allows carriers and RespOrgs to streamline the toll-free number provisioning flow and integrate the power of 8MS into their in-house IT infrastructures.

Toll-Free 8MS CPRGen
An add-on service that automates the generation, management, and optimization of complex geographic toll-free routing.

Toll-Free 8MS LCRGen
An add-on service that creates least-cost routing by minimizing external carrier costs and generating optimized toll-free routing.
